OPTICARE[®]

PRESHAKE

Opticare Preshake a liquid stepping stone between milk and dry feed. This premium milk replacer complements the **Opticare Milk** and can be used to supplement sow milk from 12 days of age. **Opticare Preshake** enables sows raise their whole litter and better prepare the piglets for weaning. The product compensates for insufficient milk supply and nutrition while simultaneously training the piglets, digestive tract.

The high nutrient density of **Opticare Preshake** provides piglets with all the necessary nutrients after 12 days of age. This compensates for the lack of nutrition, when the sow's milk production cannot keep up with the litter. Resulting in more piglets weaned from the sow, fewer foster sows needed and heavier, healthier, and more uniform piglets at weaning.

Stimulate intestinal development

Due to an optimal combination of milk components and plant sources. Digestion of cereals and soya is introduced and adapted to earlier. As a result, intestinal development is stimulated by increased dry matter intake before weaning. The result is a smoother weaning process through gentle introduction of dry feed, while maintaining milk components.

Opticare Preshake contains coconut fat. This easily digestible energy source ensures increased growth rates due to its antibacterial properties and therefore improves the intestinal health of piglets, reducing mortality at weaning.

Easily and quickly soluble in water

In **Opticare Preshake**, high-quality milk products are processed in optimal conditions. As a result, the digestibility of milk protein, fat and lactose remains as if straight from the sow, and retains it's palatability. Naturally this leads to improved intakes and therefore performance of the piglets.

Opticare Preshake is highly soluble and mixable (200-250 g/litre) in water (50- 55°C). By adding a special acid mix, the pH value remains stable, leading to a stable, tasty and fresh product.

The product was specially developed for the Swinco Big Litter Concept in which the cup system 'Opticare Automix' is central, but can also be used in other piglet rearing systems with milk cups, round feeding troughs or valve systems.

Specifications:

Crude Protein (%)	19,0
Crude Fat (%)	9,0
Lactose (%)	25,0
Crude Fiber (%)	0,35
Ash (%)	6,5
Lysine (%)	1,4
Calcium (%)	0,8
Phosphor(%)	0,7
Sodium (%)	0,6
Copper (mg)	140
Vit A (IU)	25 000
Vit D (IU)	10 000
Vit E (IU)	300

Code: 94103314
